

Carma Folding

MATERIALS

Folding table with castors.

Leg and joints high-pressure die-cast aluminium. Quality UNE L-38263. Painted or ball-polished.

Castors with brake.

Columns Ø60mm diameter, 2mm thick steel tube.

Profile structure U-shaped steel.

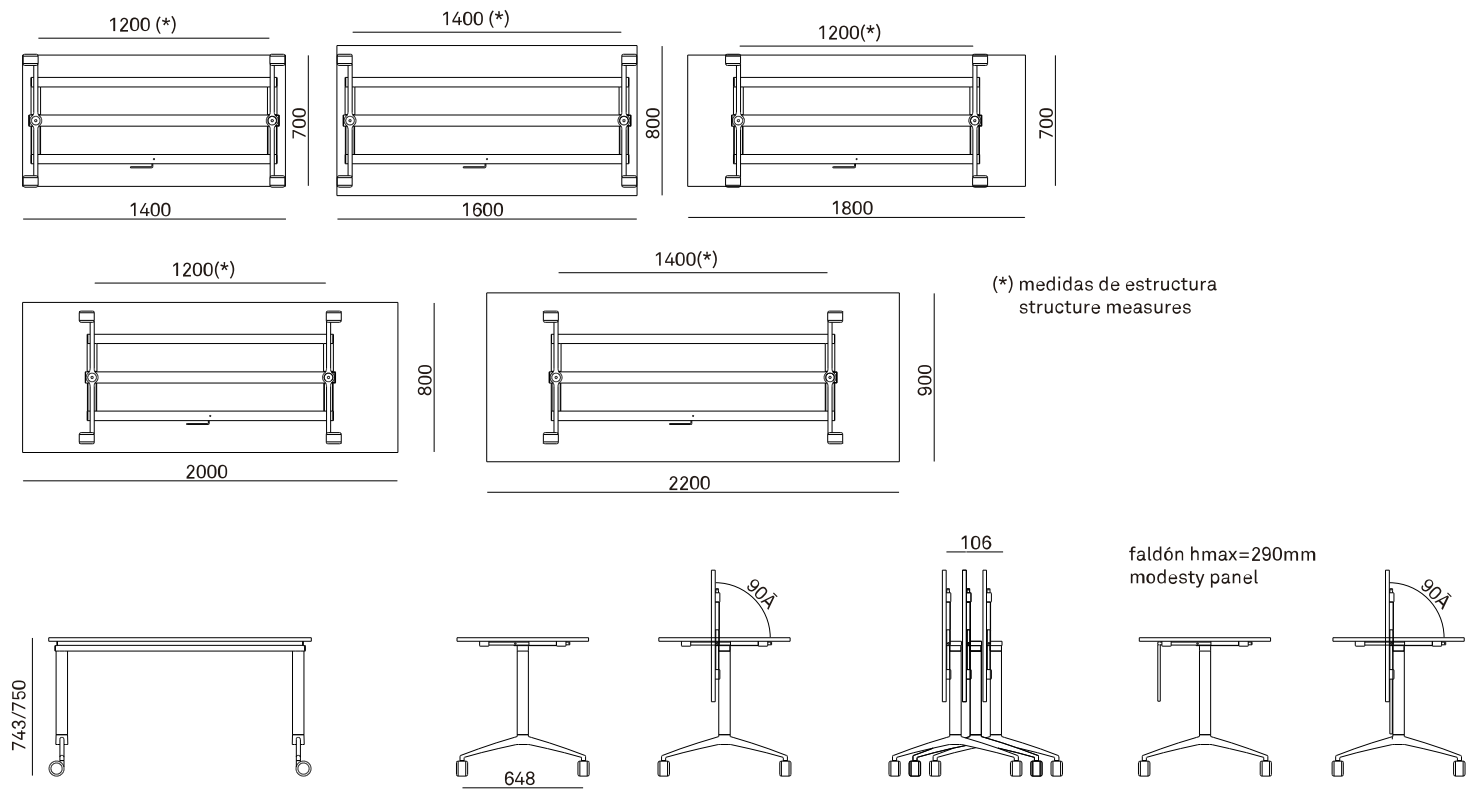

Mechanism shafts and steel cables connected to a lever.

Top 20mm melamine, 13mm compact resin or 20mm wood veneer.

Metallic finishes epoxy/polyester paint with a thickness of 50-90 microns depending on the colour, ISO 2409 Gt 0 adhesion and ASTM 2794 impact 2.5 joules reverse & direct or chrome finish, composition: 98.4% NI, 1.6% CR, 24.4 micron thickness and UNE EN ISO 2409-96 adhesion, Classification 0

Measures

Accessories

Electrification Box - AC070
144x78,6mm support /
135x67mm cut out.
Surface electrical unit with 2
schukos.
White or black colour.

Electrification Box - AC071
267,75x78,6mm support /
258,8x67mm cut out.
Surface electrical unit with 1
schuko + 1 USB charge A et
C + 2 RJ45 + 1 HDMI.
White or black colour.

USB Charger - AC083
Ø70mm support / Ø60mm
cut out.
1 schuko + 1 USB charge A
and C.
Black colour.

Joint - 799/A
Four units per table.

Modesty Panel
Modesty panels in 19mm
melamine, 12mm compact or
19mm wood.

Flexible Cable Riser - A34/M
Flexible cable riser.
White or black colour.

Akaba Quality

At Akaba, we understand manufacturing as an essential part of our commitment to responsible design and continuous improvement. All our products are developed under the ecodesign criteria defined by **ISO 14006**, integrating environmental considerations from the earliest stages of product conception and development to the end of its life cycle.

This approach allows us to move towards more efficient, durable, and easily recoverable solutions, prioritizing materials and processes that help reduce the environmental impact associated with our industrial activity.

Furthermore, Akaba has a certified management system in accordance with **ISO 9001** and **ISO 14001** standards, ensuring both the quality of our processes and products as well as environmental management focused on prevention, control, and continuous improvement of our environmental performance.

The combination of design, industry, and sustainability is part of our way of understanding furniture: products designed to generate wellbeing in spaces, with responsible manufacturing aligned with current environmental challenges.

Materials

Wood

Wood and derivatives sourced from **European** suppliers and controlled sources. FSC and PEFC certifications available upon request depending on material type. Renewable, reusable, and recyclable materials depending on composition. High durability and suitable for material recovery at the end of their life cycle.

Metals: steel and aluminium

Steel is the most recycled material in Europe, with rates above 80%. Aluminium typically incorporates between 30% and 40% recycled material and reaches recycling rates close to 95% at end-of-life. Both materials are **100% recyclable** without loss of properties.

Epoxy coatings

High-durability powder coatings. All coatings are lead-free and comply with **EcoVadis** certification requirements. They reduce maintenance and extend product lifespan. Suitable for recovery of the metal substrate during recycling processes after removal.

Polypropylenes

Recyclable thermoplastic material. Some product references are made from **100% recycled polypropylene**. Lightweight, resistant, and suitable for industrial injection processes. All versions are recyclable at the end of their life cycle.

Upholstery

Fabric selection meets aesthetic, functional, and environmental criteria. We collaborate with European suppliers operating under certified environmental management systems and prioritize fabrics with certifications such as EU Ecolabel. Our textile collections include recycled fibers, natural-origin materials, and treatments that are respectful of human health and the environment.

Foams

In upholstered products, we use flexible polyurethane and viscoelastic foams designed to ensure comfort, ergonomics, and durability. Many of these foams are **OEKO-TEX** certified, ensuring compliance with strict standards regarding harmful substances and user safety.

Worktops

Surfaces in melamine, HPL, compact phenolic, or wood. We work with **European suppliers** with certified European origin and, upon request, **FSC certification**. Materials with high mechanical and chemical resistance, with varying recyclability depending on composition, prioritizing long-life solutions.

Packaging

Cardboard and recyclable packaging materials. Progressive incorporation of recycled materials, such as plastic bags made from **100% recycled plastic**. Volume optimization to reduce logistics impact. **100% recyclable** and easily separable materials for conventional waste streams.
