

Lattice Table

Lattice Table is a communal table that seats 4–6 people. It has a steel grid canopy above the table where plants can hang. The side panels are made of felt with cut slats that create a transparent effect. The transparency changes depending on the viewing angle — from one side, the table appears more closed, while from another, it becomes more open. This creates a balance between openness and privacy. Lattice Table is made for gathering and sharing ideas.

Flexible Design: Wall-Mounted or Freestanding

Lattice Table can be fixed to the wall or used as a freestanding table in the room. Both options provide flexibility for different spaces. Choose the setup that works best for your needs. Four of the models have a standard height of 750 mm, while the other four are counter models with a tabletop height of 900 mm.

Lattice Table – Available in 8 Models

4-Person

- 6400-0005-0026, Dark Grey
- 6400-0005-0029, Green
