# Softline Floor Screen

Softline is a timelessly designed screen that absorbs noise effectively and creates a more pleasant soundscape. It is characterised by a design language of “little gestures” – like its rounded corners, which contribute to an inviting and friendly atmosphere. Softline is highly compatible with other furnishings and blends in beautifully in most settings. To add a personal touch, you can choose from a wide range of colours!

## Specifications

The screen is built on an upholstered solid wooden frame with sound-absorbing filling. Aluminium leg in black/grey/white lacquer. Also available with wheels. No tools are required to assemble the screens.
