

Table

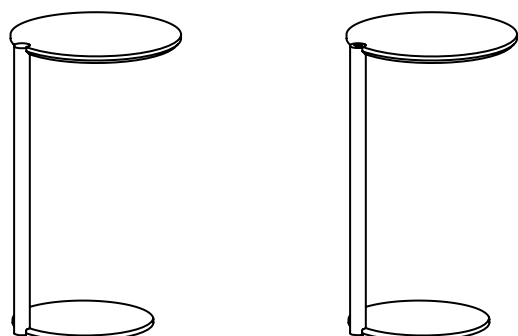

DROPS USB Table

design: Piotr Kuchciński

Simple design and functionality. Free access to charging sources. Due to its small size, the table can be freely arranged in any space. The stable structure of the table is based on a powder-coated metal frame and the top is made of a varnished MDF board in a wide range of colors.

Collection features:

- stable structure
- quick access to the sources of the hold
- there are two USB sockets in the table top, to which you can connect USB powered devices: a phone or a tablet
- the table is equipped with 2 1A sockets with 5V charging voltage
- 2m long power cord
- plugs in two versions: PL, GB
- fits many spaces, from office to home
- table top and frame available in full colors according to the Balma pattern book
