

DYNAMIC FLEX WALL

by Claus Jakobsen

CHAT BOARD® product sheet

Dynamic Flex Wall

CHAT BOARD® Dynamic Flex Wall positions itself as the natural extension of the Dynamic range, in a complementary wall-mounted addition to the versatile collection designed by Claus Jakobsen.

Modelled on a matching framework and shaped in the same recognizable design language, it forms a perfect aesthetic partnership with the Dynamic freestanding, mobile units, while offering an extensive variety of self-contained wall-mounted solutions in their own right.

As the very first of its kind, Dynamic Flex Wall presents not only an elegantly framed alternative to the signature wall mounted boards but also offers the option of updating previously acquired boards with a beautifully finished frame in warm and touchable oak wood, instantly and effortlessly changing the look and mood of its surroundings.

Flexible by nature and name alike, Dynamic Flex Wall is fully past-, present- and future-proofed, allowing for continuous updates according to mood and circumstance. Whether it is changing the magnetic board to one of another colour or finish, or simply changing the mounting direction, Dynamic Flex Wall offers unparalleled flexibility and freedom.

Wood frames and boards are purchased separately, letting you choose between a ready-packaged solution and the ultimate retrofit.

Dynamic Flex Wall is available in 5 sizes and is crafted from solid oak wood, finished with a matt PU lacquer. Frames are delivered fully assembled and are easily fitted with the boards of your choice with the same, easy-to-do system applied when mounting boards directly onto a wall surface. As is the case for all wall-mounted boards in the CHAT BOARD collection, Dynamic Flex Wall **can be mounted both horizontally and vertically**.

Glass boards are made with 4 mm tempered safety glass, in accordance with the highest quality standards, finished with either smooth C-edges and 4 mm radius corners (Classic and Matt), or with polished V edges and 90° corners (Elements). Choose between a glossy Classic and a velvety Matt finish as well as the palette of 25 (Classic and Matt) or 5 (Elements) standard glass colours. In addition, the glass can also be made to order in bespoke* standard RAL or NCS colours, available for glass.

BuzziFelt pin boards are made with 6 mm 100% recycled P.E.T. felt which provides a sound-dampening effect, making them the ideal companions for glass boards.
